

**THE
GOVERNMENT'S
OVERREACH
AND
POWER
GRAB**

JOHANN HEYNECKE

THE ANC GOVERNMENT'S OPERATION OVERREACH and POWER GRAB!... Is it in line with the insane plans of the World Economic Forum?..

Please everyone that receive and read this... Doesn't matter if you agree or not with what I've written here, please don't keep it for yourself... Spread it far and wide, let more people see and read, what's going on in the world... But not just in the world, in South Africa as well... Reading through this, pull it through to what's happening currently in our country... Connect the dots and see the bigger picture and understand why we have these problems that we have in South Africa...

Johann Heynecke... Cell. No: +2771 414 0699...

Date: 9 February 2025...

● **South Africa's Government Overreach: A Systemic Power Grab**

South Africa's ruling elite - primarily the ANC - has weaponized state institutions to entrench its dominance, bypass accountability and suppress dissent...

This overreach manifests in several key domains:

⚖️ **Erosion of Constitutional Boundaries...**

- **Judicial Overreach & Executive Bloat:** *The ANC has blurred the separation of powers, with executive decisions often escaping judicial scrutiny or being shielded by politicized courts...*
- **Local Government Subjugation:** *Mayors from major metros have warned against national interference, arguing that municipalities are being treated as mere extensions of central authority rather than autonomous entities...*

🏢 **Institutional Capture & Corruption...**

- **Zondo Commission Revelations:** *State resources were systematically looted under Zuma and many implicated figures remain in Ramaphosa's Cabinet...*
- **Law Enforcement Paralysis:** *Police and prosecutors are compromised, unable to confront organized crime networks protected by political elites...*

🚧 **Manufactured Crisis & Controlled Decline...**

- **Education Collapse:** *Most Grade 4 learners cannot read for meaning and understanding, a deliberate sabotage of cognitive autonomy...*
- **Economic Sabotage:** *Ramaphosa's refusal to reform failing policies signals a commitment to ideological control over functional governance...*

🌐 **Alignment with the World Economic Forum's Agenda...**

The WEF's stated goals - "Rebuilding Trust," "AI for Safety," and "Climate-Energy Transitions" - are framed as benevolent, but they mask a deeper ambition: centralized control through technocratic governance... South Africa's alignment is not accidental - it's strategic...

🔗 **Ideological Convergence...**

- **National Democratic Revolution (NDR):** *The ANC's core doctrine mirrors WEF's collectivist ethos - sacrificing individual autonomy for systemic "progress"...*
- **Digital Surveillance & AI Deployment:** *South Africa's participation in WEF discussions on AI and governance signals a willingness to adopt predictive policing, biometric tracking and algorithmic control under the guise of "safety"...*

🏠 **Public-Private Collusion**

- **WEF Partnerships:** *South Africa's delegation includes corporate giants like Naspers and Old Mutual, reinforcing the fusion of state and corporate power...*
- **Investment Theatre:** *Ministers use Davos to present a sanitized narrative, masking domestic collapse while courting global capital...*

Psychological Reframing...

- **Narrative Engineering:** The WEF encourages South Africa to “present the story for what it is” - a euphemism for reframing systemic failure as transformation...
- **Solidarity & Sustainability:** These themes are used to justify austerity, energy rationing and digital ID systems - all under the banner of global cooperation...

Final Synthesis...

South Africa is not merely misgoverned - it is being restructured... The ANC's internal overreach is a local expression of a global blueprint: dismantle democratic accountability, centralize control and digitize compliance... The WEF offers the ideological scaffolding; the ANC provides the machinery... Together, they form a technocratic regime masquerading as progress...

We have the freedom to choose real life or a fake existence...

Nature and the outdoors is real life, where everything grows, blooms vibrates and flows... You have adventures everywhere that you can enjoy to the fullest... You are surrounded by pure life, the birds, butterflies, bees, beetles, animals... on land and in the sea...

Plants, flowers, trees and fruits... There is an incredible wealth and abundance of beauty... and just about everything is good, healing, strengthening and beneficial to our body and mind... In nature, we come alive, find healing and rediscover who we are truly meant to be...

Yet, the forces of darkness seek to strip that away from us, confining us in concrete structures (smart and 15 min. cities)

*Something that become clear over time: **The lie become the truth... and the truth the lie!... The people spreading the lie as the truth will do anything and everything to stop those who expose the “truth” for the lie it is...***

So how far would the anc government go to take away all of our rights in life?... Actually: My question is how far would any of the political parties go to take away our rights if they were in power?...

Well they are in the process and trying to do it, but be sure it isn't just because they are corrupt and without moral... This is not just a case of the mismanagement and corruption on the side of the government... From before the 1994 election and specific after giving the reins over to the anc terrorist organization...

The plan of total destruction of South Africa where set in motion, a planned attack against us the citizens of south Africa...

*Have a look at the **following** points and make it applicable on life today in South Africa...*

Saul Salinsky who died in 1972, wrote the following: How to create a social state... According to him there are 8 levels of control that must be obtained, to create a social state... Controlling the population, rule over all human... But what he wrote isn't new for his time and the time that we are living in now...

1... Healthcare... Controlling healthcare and you control the people...

What is the National Health Insurance Bill other than a tool to control healthcare, also creating an additional tax burden for us the citizens of South Africa?... They could not run and manage the current state hospital and healthcare system... Our state hospitals are in dilapidated state... What will happen with the NHI, more money that they can and will steal?...

2... Poverty... Increase poverty as high as possible; poor people are easier to control...

Approximately 55.5% (30.3 million people, that is half of South Africa's population) of our population is living in poverty... While a total of 13.8 million (25%) people are experiencing food poverty...

27.3 Million people in South Africa is receiving some sort of grant from the government, out of a tax paying pool of 7.1million tax paying individual taxpayers... Of this 7.1 million taxpayers, 3 million pay about 90% of the yearly individual tax...

Now the question is: “How is this sustainable?”...

3... **Debt...** Increase the debt to unsustainable levels... Then taxes can be raised, creating more poverty... South Africa's external debt stands on \$158.1 billion (US Dollar), that is 54.1% of our GDP... Now for the bad news for us, the citizens... That means that every man, woman and child in South Africa sits with debt of \$ 2 635 000.00... That is nearly R 50 (49 590 700.00) million that each citizen owns in international debt...

The really bad news to come, watch immediately after voting day the 29th May... The anc government is going to increase personal tax, because we sit with a budget deficit of R 331.4 billion... That is 4.7% of GDP and somehow the government must make that shortfall up...

4... **Gun control...** Remove the ability self-defense, that way a police state can be created... On 21 May 2021 the Firearms control amendment bill was published in the government gazette on the proposed ban on owning a firearm for self-defense and to reload your own ammunition... WHY?... It where criticize and opposed heavily by gun owners and the public and the government took it in review... But be assure it's not of the table and will feature again in the nearby future... Just as what happened with the bela bill and the land appropriation bill... What will also happen to the nation health act amendment...

Something interesting about the gun control amendment bill, it come in precisely the same time when America and other western countries tried to amend their gun control policies... Is it coincidence?...

5... **Welfare...** Taking control of every aspect of their lives, food, housing and income... Social assistance, including grants and public works, is funded through tax revenue... Unlike statutory and voluntary funds that are funded by employers and employees... Social welfare programs in South Africa include cash assistance, medical provisions and housing subsidies...

Unemployment plays a great role in poverty and welfare of a country... Under the youth of South Africa, the unemployment rate climb from 36.35% in 2004 to 50.47% in 2023...

What is the solution?... Job creation!... But go ask the ruling party and every other party what is their solution for this problem and you will get the answer: "Increase social grands and bring in more grands"... Why?... TO CREATE A WELFARE STATE AND CONTROL THE PEOPLE TOTALLY... And don't tell me that the DA are different than the ANC or EFF... The DA are 2 degrees left of the ANC...

6... **Education...** Take control of what people read and listen to, take control what children learn in schools... Here we the citizens of South Africa sit with a very big red flag, THE BELA BILL... The government in short wants total control over every school and form of schooling... Doesn't matter if it's a public school, private school or you who home school your kids... They want all of those kids back in mainstream schools under the governments control...

Why?... SO THAT THEY CAN DICTATE WHAT THE CHILDREN LEARNS IN THE SCHOOL...

The bad of this, the parents won't have a say or a platform (school governing bodies) to stand on and fight it... The parents that disagree with this and took their kids out of the school, well a shock for you... You can be jailed for up to a year and then you also stand a change that your children will be taken away from you and put in the governments care, with no possibility to get your children back...

Now there are organizations and individuals that are fighting this bela bill, all fighting to keep the control in the hands of the parents and the school governing body... Good and well, but all of them fighting it is to keep afrikaans in afrikaanse schools... Now don't understand me wrong, I'm as Afrikaans as can come... But the focus point of this fight where wrong from the start, by making it about afrikaans so many parents of other languages and groups were excluded from the fight...

I've always said, that if the fight where about stopping the government from introducing radical sex education and the lgbtqa+ narrative in our schools and that is the actual aim of the bela bill... So many more parents would have joined the fight against the government's power grab to gain control over our children, grandchildren...

Now another question: "Where is the political parties condemning this bela bill and in total the lgbtqa+ narrative?... There were just 2 political parties who spoke out against it, FF+ and the African Christian Democratic Party (The ACDP are called homophobic for their stand on the bill and lgbtqa+)...

*Where are the DA, John Steenhuisen and the other leaders of the DA on this matter?... Well John Steenhuisen and other party leaders paraded last year during pride month on the streets of Capetown with the pride flag draped over their shoulders and the western cape government / education department implemented a mini bela bill in the western cape, bringing in gender neutral bathrooms in the schools, ext...
Just show you what is their stand on this matter...*

What is the whole purpose of promoting the lgbtqa+ narrative in our school system, pushing it down our throats, here and all over the world?...

Make unnatural sexual relationships the norm and healthy families "weird"... Normalize pedophilia (The WHO / WEF and UN already called on governments to decriminalize pedophilia, as it is just another sexual orientation and can't be discriminated against) promote every form of sexual perversion, as something we "must except"... This called "inclusion"... Standing up for purity, holiness, healthy relationships and happy families is labeled "hate speech"... How to end the natural family?... By pushing the LGBTQA+ agenda / narrative and labeling any one that opposes this narrative as homophobic...

Whoever that wants to crucify me for what I'm saying... Go for it... God created 2 genders / sexes, not 20, I mean 45 or no wait 70, sorry, sorry I'm wrong 100... Just 2, man and a woman... He did not create a man in a woman's body or a woman in a man's body...

So a man who identify as a woman or a woman identifying as a man is pretending to be something that they aren't... That is fraud!... I challenge anybody to go and pretend that you are the president and see what happens with you!... So why must we indulge a person's mental sickness who pretends to be something that they aren't and we must also pretend that it's the truth?... NO!...

People of South Africa, don't take this bullshit... Stand together and fight this evil of this draconic, power hungry and government and every other political party who is promoting this bela bill... Fight it in totality, not just parts of it... They can't throw all of us in jail for standing up for what's right... We don't stand and won't tolerate that teachers stand and learn our children, grandchildren that you can choose what gender you are, doesn't matter what your parents / grandparent's or society say...

We will not tolerate that our kids / grandchildren learn from an early age that is all right if boys, play sexual games with boys because it's natural to do so... That it's right that girls play sexual games with girls because it's natural... That kids learn that it 100% natural to be sexual active from any age off...

That our children / grand children learn in school that if you get pregnant, you can get an abortion without your parent's permission... The school / teacher will help and assists the child with that...

This bela bill is threatening parents the right to choose the education best suited to their own children without interference from the state...

7... Religion... Remove the believe in God from schools, governments and society...

One question: "Is Christianity under siege in South Africa?"... YES!...

But not just here, all over the world... In Europe people get arrested if they stand on street corners and prophets God's word, America is busy to declare the bible as hate speech... In South Africa church ministers stand on the pulpit and preach that they must be careful what they preach and from which parts of the bible, because they can get into trouble with the government... This is censorship of the Word of God and it is going to get worse!...

8... Class warfare... Divide the people in to the wealthy and the poor!...

Do I need to say anything on this point except that the anc government and governments around the world are in the process of destroying the middle class... Widening the gap between rich and poor further, getting more control over the people...

Does any of this sound like what's happening to South Africa?...

It is a BIG YES, these 8 points are busy happening in South Africa... This will also intensify over the next few years to come as there are other things that we must look also at of what's happening in our country...

1... Divide the nation philosophically...

2... Foment racial strife...

Who are keeping the racial issue in South Africa alive?... The anc and eff politicians, they are inciting racial tension between the people of South Africa!...

3... Cause distrust of police authority...
Our police force is a disgrace to say at least...

4... Swarm the nation's borders indiscriminately and unconstitutionally...

5... Engender the military strength to weaken it...

6... Overburden the citizens with more unfair taxation...
Just think of all the different taxes that there are what we must pay?...

7... Encourage civil rioting and discourage accountability for all crime...

8... Control all balloting...

9... Control all media...
This diabolic nightmare hasn't it become emerging reality?...

There are more points to look at:

10... Threatening your right to rights, by making it harder to get to court and enabling the Government to direct judges in their judgements...

11... Threatening a parents right to choose the education best suited to their own children without interference from the state...

12... Threatening our children's right to a higher education; limiting the number of students, the types of courses and making it harder to access...

13... Threatening our democratic right to protest, speak out against the government... By threatening people with jail time and putting injunctions on people to prevent them taking part and to speak out...

14... Threatening our right to good food by passing laws to allow extensive GMOs... lab manufactured food...
Under this point you can also put the engineered take down of food, water and energy infrastructure... For how many years are we now crippled by load shedding and the end isn't near... Water problems are also on the rise leaving cities and communities for days on end, weeks without water...

This will worsen when the lesotho hoogland water pipeline are closed for 6 months for maintenance, as the whole of the free state and 60% of gauteng are dependent on this water... Yes, maintenance must be done and had been done in the past... Let's hope over the last 30 years it where done, although I doubt it...

But... It can't be help but to notice that Jackson, Mississippi's water infrastructure collapse – leaving 180 000 americans with no water...This was allowed to happen by withholding maintenance (Is the same happening in South Africa?) from the water treatment system...The water supplies are being cut off via geoengineering, around the world, causing global droughts and widespread crop failure... Are we going to see widespread crop failure in the free state and other parts of South Africa during the time that the lesotho highland water pipeline is shut down?...

- 15... Threatening people and whistleblowers with jail for exposing the government when they do something wrong...
- 16... Threatening free speech in public and online (social platforms) which wants to outlaw anything the government thinks is "illegal and harmful" content...
- 17... Threatening your right to run a company by giving the government extensive powers and threatening your right to earn an income...
- 18... Threatening the right to privacy as they want to remove all laws, allowing our data to be shared freely... As well as other effects...

All of this points just to say: Do as you are told...

Remove all personal rights from humanity under the guise of "we are in this together" and "for the greater good"... Create hostility towards people standing up for their rights, by labeling them "selfish"... Create a herd mentality, where independently thinking individuals are singled out and attacked...

*I'm afraid of my friends, family and people who have no problem falling in line with a system of control...
Because one day they'll have no problem turning on me for not doing so...*

THIS GOES AGAINST ALL OF OUR DEMOCRATIC AND CONSTITUTIONAL RIGHTS...

Just as a last thought: This is how evil operates, it always hides behind a mask of good...

Governments (The anc government and other political parties in South Africa are no different) around the world claim to serve the people, while they suppress and enslave them...

*The pharmaceutical industry says they heal people, while they are the main cause of chronic health problems...
Vaccines claim to save lives, while they cause chronic genocides...*

Mainstream media says they inform the public, while they deceive everyone...

Schools and Universities say they makes kids smarter, while in fact they prevent them from being creative independent thinkers...

Museums and libraries claim to be treasure troves of knowledge, while the true discoveries and knowledge are all kept from humanity in cellars that stretch for miles underground...

Law enforcement says they protect good citizens, while in reality they are the extension of the cruel criminals in government...

Again citizens of South Africa, don't be like three monkeys and see nothing, hear nothing and speak nothing!... Open your eyes and see the evil of the power hungry government... Open your ears and hear the evil that the anc government is busy with... Then open your mouth and speak out about the evil what you see and hear!... But don't be fooled by the other political parties in South Africa, they will continue on the same path as the anc...

No politician or political party are our friends, don't believe it that they are looking out for us!...
